Nick

Night Howlers aren't wolves, they're toxic flowers.

I think someone is targeting predators on purpose and making them go savage

Wow.

Isn't that interesting?

Wait, please don't... I know you'll never forgive me.

And I don't blame you.

I wouldn't forgive me either.

It was ignorant, and irresponsible, and small minded.

But predators shouldn't suffer because of my mistakes.

I have to fix this.

But I can't do it without you.

And after we're done...

You can hate me. And...

And that'll be fine.

Because I was a horrible friend and I hurt you.

And you can walk away knowing that you were right. All along.

I really am just a dumb bunny.
